## **The World's Marketplace for Mining Products and Services.**

The global demand for more efficient mining equipment and technology is greater than ever. West Virginia has been mining coal for more than 150 years, and no one is more experienced in this area.

The state's expertise and longevity have allowed us to make countless innovations and improvements in the mining industry. Mine safety is a priority in West Virginia and we continue to implement new initiatives to advance our mines, our equipment and the technology we use every day to work toward our goal of zero fatalities. West Virginia's innovation benefits mining operations around the world.

West Virginia is the world's marketplace for mining products and services and is committed to providing the tools your company needs to succeed. Please review this Buyer's Guide and consider West Virginia's companies as you plan for your success and safety.
